Career Counseling Advice in the New Economy

"Don't ask kids what they want to be when they grow up but what problems do they want to solve. This changes the conversation from who do I want to work for, to what do I need to learn to be able to do that."

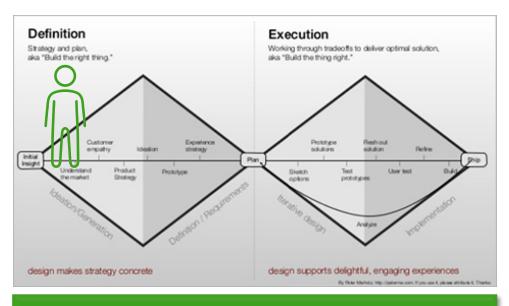

Jaime Casap, Google Global Education Evangelist

What is the problem, truly?
Who has it, truly

And why is this important?

Digital transformation happens

The world around us is changing. Industry 4.0 and the Platform Economy are impacting how business is being made. Technology is no longer a limiting factor.

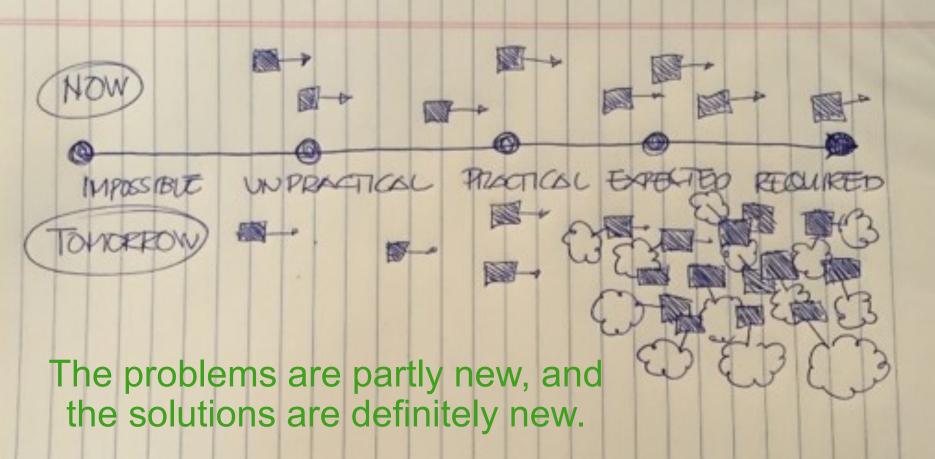

OPERATIONAL EFFICIENCY

BUSINESS INNOVATION

We need to
transform the data
we collect to
understandable
information, that in
turn builds
knowledge and
generates value

Customer Interaction: Trust as a Service®

- Finding new relationships and working with existing customers
- Forecast transparency and co-planning
- Traceability in logistics and product
- Oustomer operaitonal efficiency
- Shared and co-created products and R&D

Operational Efficiency: We are highly skilled automated craftsmen

OEE targets

Machine Learning/Deep Learning/AI Virtual and Augmented Reality

Business Innovation: Digital transformation in the platform economy

- We have so many capabilities making us the perfect packaging partner
 - We know "everything" about paper, cartonboard and packaging and how to manufacture, design and optimize packaging
 - > We have a strong network
- Defining and building our role, services and business models in the value network of materials, solutions and services
- Early stages. Continued conversations.

Managed Packaging

We leave our Material R&D comfort zone to be service designers

- We help brand owners design the perfect packaging
- We set up the supply network
- We make it availble to OEM:s
- Financial gains
- Sustainability gains

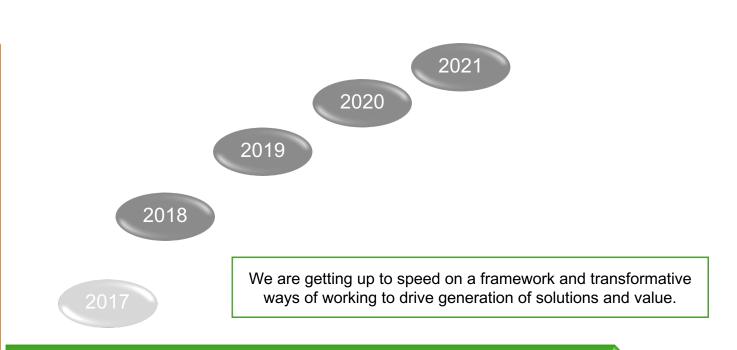

Digital transformation happens outside the boxes

- Customer generated data helps Operational efficiency, and can in turn help Customer Operational efficieny
- Operational Efficiency solutions generate their own business models
- Business innovation generates new ways to meet our customers

We develop our capabilities to find new solutions

Framework and mechanisms to drive continued transformation

Effectiveness

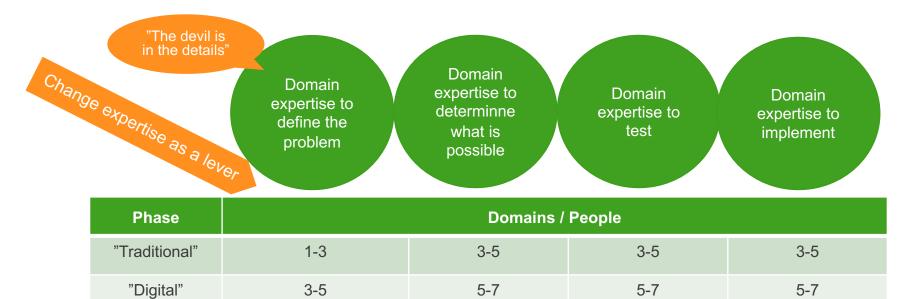

Digital transformation capabilities are built together

| Identifying, developing and launching new, digital business models | Successful corporate venturing business | Every aspect of operations re-examined | World Economic Forum/White Paper Digital Transformation of Industries: In collaboration with Accenture Digital Enterprise January 2016 and the right partnerships The views expressed in this White Paper are those of the author(s) and do not receivary in present, the views of the World Economic Fourm of its Members and Partners. White Papers are submitted to the World Economic Fourm of the Members and Partners. White Papers are submitted to the World Economic Fourm as combutions to its insight areas and interactions, and the Fourm makes the final decision on the publication of the White Papers. White Papers decision for required in progress by the author (s) and are published to elect comments and further decision. |
|--|--|---|--|
| Understood and leveraged data | Sufficient investments in security | A high-quotient digital workforce | |
| Integrated automation and on-demand workers into the workforce | Establish the right digital traction metrics | Convince your investors about your digital transformation journey | |

In the nexus of the right competences and timing

To little surprise, real change in high complexity is difficult....

Domains further "apart" -> New constallations

More management domains and priorities

Being a high quotant workforce on top of everything we already know

| Business Context | People and Leadership | Process & Tools | Info and Technology |
|--|---|---|---|
| Digital Business development | Change Management | Project Management / Multi- modal | Robotics and Automation |
| Business domain expertise to enable smart use of digital | Digital transformation Digital awareness | Design Thinking | Integration/API Management |
| Digital Time traveller | Communicate and Educate, Storytelling | Information Management | Cyber Security incl IAM and Blockchain |
| Ability to build eco systems and partner networks | | "Current" system development/DevOps/Test | Analytics Data Science -> Al |
| Regulatory, standards and legal expertise | | Regulatory, standars and legal frameworks | Network, Connectivity, IoT and Mobility |
| | | | Architecture with Cloud as a component |

Our ability to utilize Information and Technology needs to mature to be smart
